

# Preventative Maintenance

**Outside Plant** Preventative Maintenance Services by Alpha Technologies

Vital components in a broadband network are located in demanding outdoor environments that are constantly subjected to nature's extremes. Ongoing **Preventative Maintenance (PM) programs help ensure network reliability** by keeping critical Outside Plant equipment operating efficiently in all environments.

## Preventative Maintenance Services

Alpha's Outside Plant service plan options include performing an array of routine, scheduled maintenance and inspections as well as responding to emergency needs and providing equipment repair, all of which is designed to keep Outside Plant operations running smoothly.

### Outside Plant Procedures

- Develop Historical Data for Each Power Component
- Perform Mechanical Maintenance
- Document Routine Service
- Test and Repair Standby Power Supplies
- Clean or Replace Air Filters
- Check and Repair Battery Connections
- Test Individual Batteries
- Verify Transponder Installation and Activation
- Verify Bond/Ground
- Battery Changeouts
