

Construction and Installation

Turn-Key Power Solutions by Alpha Technologies

With a national network of contractors, project managers and technicians, Alpha provides turn-key installation and construction solutions for Broadband **Outside Plant** and **Critical Facility** initiatives/projects.

Installation Services

Alpha's complete installation and facility construction services include structure engineering, right-of-way and easement procurement, site preparation, equipment installation, utility hook-up coordination, system turn-up and testing. Additional services include:

- All site negotiations, including permit processes
- Professional project management and quality control
- Obtainment of necessary installation certifications
- Coordinated product and service ordering and billing
- On-site commissioning

Turn-up and Test Services

Alpha's turn-up and test services for Headend, DC Plant and Outside Plant installations represent a significant first step in ensuring long-term system reliability. Services include:

- Certified installation inspections
- Completion of Alpha start-up procedures
